2019. SHRI VIREN J. SHAH:
SHRI PRAMOD MAHAJAN:

Will the Minister of AGRICULTURE be pleased to state:

(a) whether rabi and kharif foodgrains production for 1995-96 estimated at 191 million tonnes is showing a lower growth rate of 1.6 per cent as compared to 2.7 per cent in 1994-95;

(c) if so, the details and the reasons therefor;

(d) the steps taken by Government to remove the effect of negative subsidies and other distortions adversely affecting the agricultural sector; and

(e) whether Government propose to free domestic trade in farm output, remove export restrictions and bring domestic procurement prices at par with international prices; if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI ARVIND NETAM): (a) to (c) Firm estimates of foodgrain production for 1995-96 are not yet available since the sowing of Rabi crops is still in progress. However, as per preliminary estimates the foodgrains production in 1995-96 may not show any significant growth over that in 1994-95 due to shortfall in kharif production owing to erratic monsoon. This

may affect the overall growth rate in agriculture in the current year which is likely to be lower than that observed in 1994-95.

(d) The Government is revising upward the minimum support prices paid to the farmers for their agricultural commodities.

(e) At present, there is no restriction on the interestate movement of wheat and levy-free rice throughout the country. To remove export restrictions and bring domestic procurement prices at par with international prices, the export of basmati and non-basmati rice is allowed freely without any quantitative or Minimum Export Price Restriction. Export of wheat products and hybrid jowar is under open General Licence (OGL)
